SWISS KRONO AQUA ZERO

Come what may!

Children's water experiments, dog's unbridled joy, or a cat chasing a fly? Or maybe carrying shopping into the kitchen in wet shoes, artistic shows put on in the living-room and an overflowing pot with the Monstera plant? Which tests will you put your floor to today? Having all home laboratories, true experimental grounds in mind, we have created five collections of **SWISS KRONO AQUA ZERO** waterproof resistant panels.

Resistant to water for up to 24 hours!

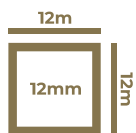

CLEANER FLOOR

The **AQUA ZERO** technology consists in combining water resistant, high-density fibreboard (HDF) with the Aqua Pearl tight lock. The special, green HDF forms a solid panel core. Humidity, unpleasant odours, bacteria and dirt do not penetrate underneath. Frequent cleaning, also with steam mops, is completely safe.

WATER RESISTANCE CONFIRMED BY AN INDEPENDENT TEST

According to the test carried out by NALFA – the American Agency of Manufacturers of Laminated Panels, with the Aqua Pearl lock the floor swells by only 7% after immersion in water for 24 hours. It is 8% less than required by the European Flood Standard EN 13329:2016 for products in the AC5 abrasion rating. The **AQUA ZERO** floor not only meets the 24-hour requirements of the NALFA test but it also ensures that all utility and aesthetic features will be maintained even after 72 hours from the moment of the accident with water.

PERFECT FOR LARGE ROOMS – EVEN 144 M²

Floors without expansion joints even on large surfaces. The three-dimensional structure of panels emphasises the beauty of wood through the combination of matt, semi-matt, and satin tones. Surface resistant to intensive use is characterized by abrasion rating AC5, and even AC6. Each and every panel is finished with a four-sided V-groove. The panels are covered with a 30 or even 40-year wear resistance warranty.

AQUA ZERO PANELS WILL SURVIVE THE TESTS OF:

- children
- domestic animals
- interiors open onto a garden
- frequent watering of potted plants
- washing floors with a steam mop

AURUM

Floors for demanding people

Полы для требовательных

Suelo para clientes exigentes

 **Compatibility without difficult choices**

Ideal strips matched to each
and every collection

Effect with full guarantee

Durability even up to 40 years

Heat from the doorstep

Each and every collection is adapted
to floor heating system

Однородность без сложных решений

Идеальные плинтусы, подходящие для каждой коллекции

Эффект с полной гарантией

Срок службы даже до 40 лет

Тепло с порога

Каждая коллекция адаптирована к напольному отоплению

Compatibilidad sin elecciones difíciles

Rodapiés combinados perfectamente para cada colección

Efecto excelente con una garantía completa

Durabilidad de hasta 40 años

Calidez desde el umbral

Cada colección se adapta a la calefacción por suelo radiante

INFINITY

Undisturbed space

Long and wide planks ideal for spacious rooms

Parameters and structure ensure the quickest assembly

Waterproof latch protects against accumulation of dirt and bacteria

Ничем не нарушенное пространство

Длинные и широкие доски идеально подходят для просторных помещений

Параметры и конструкция обеспечивают самую быструю сборку

Водонепроницаемый замок защищает от скопления загрязнений и бактерий

Espacio ininterrumpido

Tablas largas y anchas, perfectas para habitaciones espaciosas

Los parámetros y el diseño garantizan la instalación más rápida

Cierres a presión resistentes al agua protegen contra la suciedad y las bacterias

SYMPHONIA

Harmonious reliability

The strongest structure allows one to create a floor without joints even on 144 m²

Stiffness of planks and their structure maximally facilitate assembly

Waterproof latch eliminates problems with swelling

Гармоничная надежность

Самая прочная конструкция позволяет создавать пол без соединений даже на площади 144 м²

Жесткость досок и их конструкция максимально облегчают укладку

Водонепроницаемый замок устраняет проблемы с образованием выпуклостей

Fiabilidad armoniosa

La estructura más resistente posibilita crear un piso sin juntas con una superficie de hasta 144 metros cuadrados

La rigidez de las tablas y su diseño facilitan al máximo la instalación

Los cierres a presión resistentes al agua eliminan los problemas con las protuberancias

SOUND

Sound wave

●
Solid structure allows one to lay as much as 120 m² of flooring without joints, even in the case of large loads

●
High profile protects the room from loss of heat

●
Rigid structure of planks ensures the most convenient assembly by means of click method

Звуковая волна

●
Прочная конструкция позволяет укладывать до 120 м² пола без соединений даже при высоких нагрузках

●
Высокий профиль предотвращает потери тепла в помещении

●
Жесткая конструкция досок обеспечивает максимально удобную укладку по технологии «клик»

Onda de sonido

●
La estructura sólida permite colocar hasta 120 metros cuadrados de piso sin juntas, incluso con cargas elevadas

●
Un alto perfil protege la habitación contra la pérdida de calor

●
La construcción rígida de las tablas garantiza la instalación con el clic más adecuado

SENSO

Energy in every step

●
Ship-deck effect thanks
to narrow panels

●
Greater pattern dynamism
even on 48 m² floor

●
Quality allowing for frequent
and long-term use

Энергия на каждом шагу

●
Эффект shipdeck, полученный
благодаря узким панелям

●
Более высокая динамика дизайна
даже на полу площадью 48 м²

●
Качество, обеспечивающее частое
и многолетнее использование

Energía por todos lados

●
Efecto de la cubierta de barco
obtenido gracias a paneles estrechos

●
Dinamismo mayor, incluso en un piso
con una superficie
de 48 metros cuadrados

●
Calidad que permite el uso frecuente
a largo plazo
